

From Hazing...

How do you overcome a history of dysfunction in new member education?

Start by providing a simpler definition of hazing.

Rethink new member education as the gateway to a healthier chapter.

Give members tools to build a productive, empowering, and hazing-free experience.

And finally, share a taste of the experience to show the power of what is possible.

...to health.

RISE has been helping fraternities and sororities nationwide confront hazing with a simpler definition and a new, more practical framework for change. The program has been met with great praise, and more than 80% of participants report gaining a better understanding of hazing.

We are now excited to introduce the “H2H Retreat,” a full-day intensive experience that empowers chapter members to rethink their idea of hazing, critique and improve the new member program and establish a plan for becoming a healthy, high-performing chapter.

The H2H Retreat is a full-day experience for the entire chapter which includes:

- ▶ “Redefining Hazing” Workshop
- ▶ Relationship-building activities
- ▶ Innovative techniques for membership education
- ▶ Individual member action plans
- ▶ Change Agent Training for chapter leaders
- ▶ Program Consultation for the education team
- ▶ Training workshop for advisors and stakeholders
- ▶ Monthly follow-up support
